

Genesis, Dinosaurs and Fossils

Does not dinosaurs and the fossil record show Genesis to be false?

Sermon Questions

1. As we discuss issues arising out of Genesis, it is important to remember that:
 - a. Science is very unreliable and should not be trusted.
 - b. Science is on the side of creationists, not evolutionists.
 - c. Science and the Bible should never be mixed, they speak to different things.
2. People reject evolution because of religious beliefs. (Yes/No)
3. Darwin believed that fossils showed progression from earliest types of one-celled life to first simple, multicelled organisms, and then to the many simple and complex organisms living today. (Yes/No)
4. The geological event that confounds evolution is called the _____ explosion.
5. The evidence of the fossil record is against evolution, not in support of it. (Yes/No)
6. What evidence do we have that dinosaurs lived just recently?
 - a. The Bible's description in Job _____ and its use of the word _____.
 - b. _____ stories and pictures from many disconnected cultures.
 - c. _____ found in some fossils.
7. Three things we should remember beyond the evidence from fossils for biblical origins:
 - a. We should have _____ in life and in God.
 - b. We should see the _____ of God, the Creator.
 - c. We should remember the _____.

Fig 1. Ancient carving from a temple in Angkor, Cambodia.

Feedback and Questions

Comments or Questions from today's sermon:

In the coming weeks we'll be tackling questions from biology, paleontology, and cosmology, are there certain questions or topics that you would like addressed to see how both the truth of science and the truth of God's word agree?
